

## Course Management

Different courses have different challenges, Bunkers, Trees, Water, Rough, Dog Legs.

Knowing how to keep the ball in play around a course can keep those scores down.

Follow this simple tracking process and try to stay out of trouble. Just say to yourself - Fairways and Greens.

Hole	Par & Distance	Fairway Hit Y/N	Green in Regulation	Bunker	Water / OB / Penalty	Putts	Any other comments?

Step 1 – Record your round

Step 2 – Review your round

Step 3 – Repeat next time you play

Step 4 – Review Round 1 against Round 2 – did you play better? Did you make the same mistakes? Repeat this process and you will really start to understand how you play your way around your course.

Step 5 – We will add more advance features into the course management as part of ongoing processes with Cohort 100, 90 and 80, and at each level record more detail at the appropriate time in the journey.
